Meet the Tutors

SHREYANSH PRAJAPATI

As a computer science researcher, Shreyansh has published 2 research papers in the area of Cloud Storage & Machine Learning at international Conferences. He has experience in large-scale software development in a US-based Fortune 500 company. Alongside, he has been mentoring and helping students and professionals across the globe to achieve the best results in the area of Software Engineering and Data Science. Shreyansh has also curated an industry-leading python course based on his 7 years of programming experience and rich industry exposure. He also helps individuals with their projects and assignments in Java, C#, Docker, AWS, Python, and other Computer Science related issues.

SHRADDHA MISHRA

Shraddha has been working as a software developer in one of the flagship software teams in a US-based Fortune 500 company for the past 4 years. She has developed end-to-end web applications as well as deployed machine learning solutions to complex real-life scenarios. Shraddha has been an enthusiastic tutor since her undergraduate years where she tutored underprivileged kids in Java and SQL. She also developed the curriculum for Python for Finance in her undergrad and was the founding member of the Machine Learning study club at her workplace. She teaches students Java, Python, Machine Learning, JavaFX, Backend Development and Data Science.

Why us?

- Guided 1000+ students from the USA, Canada, Saudi Arabia, and Hong Kong
- Chegg tutors with 98% positive reviews
- Ensured reliability and work satisfaction
- Affordable price and money-back guarantee
- One-To-One interaction with industry leaders for tutoring, test preparation, assignment help
